

Dominique_20130531_062_392_96K_avec2405H.pir

Dans cette analyse la priorité a été donnée à la superposition des maxima des impulsions de chaque haut-parleur.

Cumulative Spectrum Setup

Axis

Log frequency axis

Remove antialiasing range

dB range (10 - 70)

Maximum frequency (Hz)

Editing

Smoothing octave

Use FR compensation

Time-frequency Fourier analysis

Analyse as CSD using apodizing window

FFT length (in samples)

FFT block shift (in samples)

Max. number of FFT blocks

Apodizing window rise time (0.02-1ms)
